"Reformed" hacker now into piracy

Check this out... I found this the other day:

<http://media.foxwhisper.co.uk/>

So if you're looking for your stuff - it could end in here:

<http://cdn03.foxwhisper.co.uk/Porn/>

<http://media.foxwhisper.co.uk/Porn%20DVDs/>

I've already exchanged emails with the guy who operates the site. Here's his twitter account:

<http://twitter.com/sleepycal>

You can google him "Cal Leeming" to learn more. He told me to fuck off... so he's essentially telling a lot of you to fuck off too. If it's the same guy, he has already been arrested for id theft in the UK. He's doing it cliphunter style, redirects, third-party hosting, etc.. the common contributory infringer deal. However.. he has slipped up in a few places and I'll keep those handy. Since he insists on playing with Stickam vids, a notorious haven for underage nude cam girls and pedos, I wonder how long Scotland Yard will tolerate that. I also wonder if the UK press know about his new venture.
